At the beginning of 2020, Israel saw the fifth record attendance in a row. At the end of the year, Israel had already started a nationwide vaccination campaign and is currently the world leader in terms of the number of people vaccinated. Based on this hopeful development, the Ministry of Tourism started a strategy to reopen the country at an early stage, which is to bring tourism back to Israel from mid-2021. The country has been opening up gradually since February 21, 2021. The next stage begins on March 7th.

We hope to see you soon in Israel and during ITB NOW Berlin

All the best and Shalom
